1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 08 June 2005 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 12 is rejected under 35 U.S.C. 102(b) as being anticipated by Kitai et al. in U.S. Patent No. 5,948,069 (of record).

Referring to claim 12, Kitai et al. disclose a transmission apparatus transmitting data received from a user terminal (Client, see Figure 3, #301) through a plurality of networks (see column 6, lines 4-19) to a destination (Server, see Figure 3, #3000), said user terminal executing communication using an Internet protocol (see column 6, lines 28-32), said transmission apparatus comprising: means for storing information relating a destination address (see Figure 1, #180) of the data and addresses of the plurality of networks (Routing Table, see Figure 1, #61a, #61b, #61c); means for storing static and dynamic information about the plurality of networks (Network I/F Information Table and QOS Control Table, see Figure 1, #73 & #85), the dynamic information including information provided from an external information source (see column 3, lines 43-47); and means for selecting at least one of the plurality of networks, through which said

Art Unit: 2665

transmission apparatus transmits the data to the destination, based on said static and dynamic information (Selector, see Abstract; see column 6, lines 20-21, see column 7, lines 44-48, and see column 9, lines 6-33).

Allowable Subject Matter

4. Claims 1-11 and 13 are allowed.

Response to Arguments

5. Applicant's arguments filed 08 June 2005 have been fully considered and are persuasive regarding claims 1-8, 10, 11 and 13. But they are not persuasive regarding claim 12.

In the remark, the applicant has mistakenly taken independent claim 12 as a dependent claim, and therefore failed to provide a valid argument. Therefore, the rejection regarding claim 12 under 35 U.S.C. 102(b) has been sustained.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alpus H. Hsu whose telephone number is (571)272-3146. The examiner can normally be reached on M-F (5:30-3:00) First Friday Off.
